

ASSA ABLOY

## Optimum Mortice Lock

The new Optimum has taken your favourite locking features and combined them to create a complete solution. This locking system offers a greater number of locking points (one, two or four point locking) and has been designed to fit the new Verona or Palladium escutcheon styles and handles. It continues to have the same routing details as used for the Millton and Lever Compression locks so will give the new features without changes to your current procedures.

The Palladium furniture will have an upgrade option, called Palladium Xtra, with the added features of a LockAlert coloured window to visually show whether the door has been deadlocked or not, and a snib option for at home security. Due to the added features it is necessary to rout two extra holes for the snib and the indicator prong.

# Optimum Mortice Lock continued...

## Features and Benefits

- Features up to four points of locking including the latch, deadbolt and shootbolts
- Sequencing of locking points can be in any order
- Upward motion of the handle activates the shootbolts
- Downward action of the handle deactivates the latch and shootbolts
- When used with the correct strikes the lock generates optimum seal compression to provide improved water and air seal performance, especially for large panel doors
- The handing of the lockset is adjusted by reversing the orientation of the latch bolt
- Standard kits are supplied with furniture and keyed cylinder
- Compatible with the ASSA ABLOY One Key Security programme

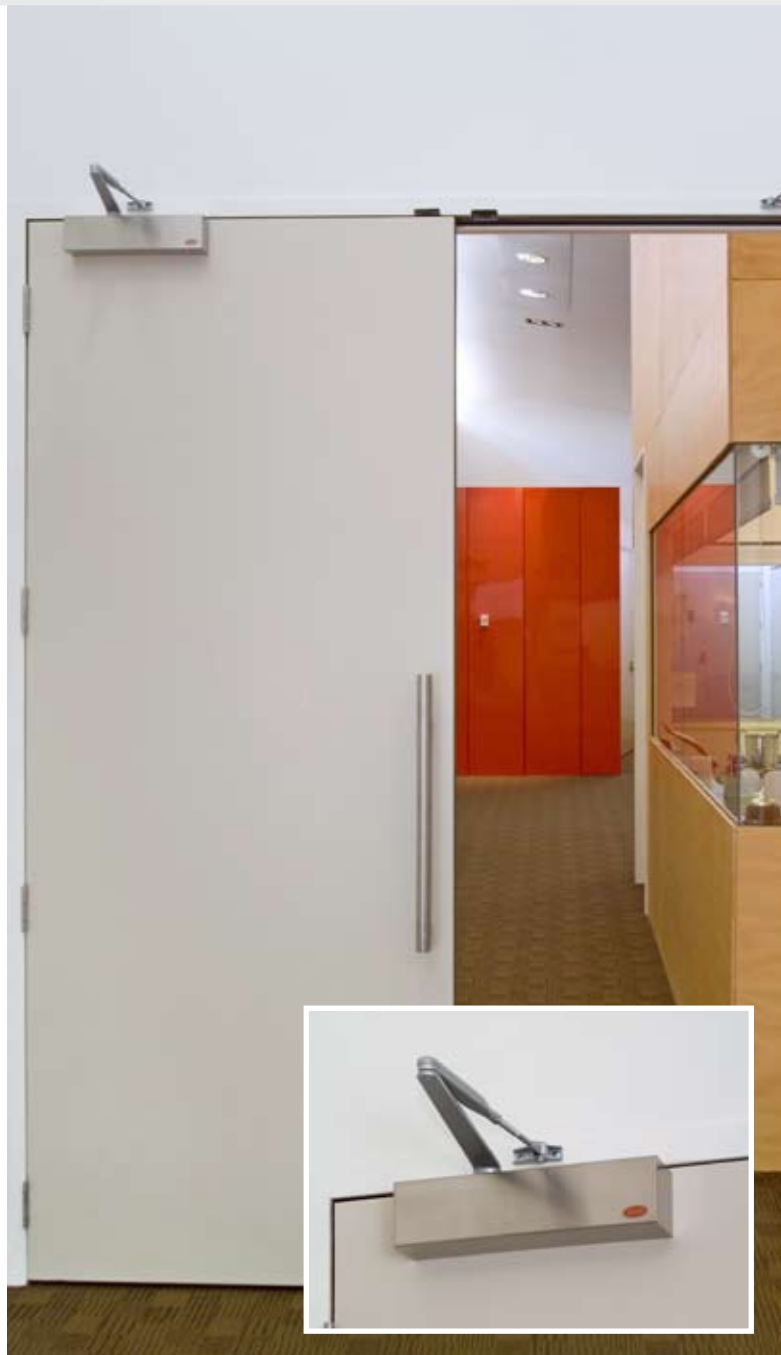

## 7726 Series Hydraulic Door Closers

It's a one stop shop with the Lockwood 7726 range of door closers which provide versatile options for door control. The range comes with either the unobtrusive Slide Arm or the Standard Scissor Arm and is adjustable to the widest range of power sizes offered in the door closer range, two to six. The 7726 series Slide Arm comes complete with hold open device. Simply lock the device in place to determine hold open position, or discard if not required. With such a variety of features, from power range, to the hold open option, this product is suitable for residential and commercial applications making it ideal to minimise stockholdings.

All door closers in the Lockwood range come with easy to follow templates and instructions. The door closer is designed to work with door weights between 40kg and 120kg and is available in silver powdercoat or stainless steel cover options.

- Suitable for residential and commercial applications
- Adjustable power size between 2-6, excellent for medium to large doors
- Snap fit arm adjustment - on standard arm
- Easy installation
- Delayed action and back check adjustment are standard

## Unparalleled Flexibility

Flexirol Multidirectional is a mobile partition wall system consisting of suspended sliding panels. It offers unparalleled flexibility without compromising the practicality of the opening and allows a maximum panel weight of 500kg depending on the choice of hanger.

Each panel is supported by two hangers which can negotiate 45°, 135° and swept 90° intersections allowing panels to be individually manoeuvred by hand into a conveniently sited stacking arrangement to open up the entire width of the opening.

### Features:

- Two weight capacities: 200kg or 500kg (per leaf)
- Max panel Height: 6000mm (except frameless glass panels)
- Max panel Width: 6000mm (except frameless glass panels)
- Virtually any panel construction can be accommodated, timber, aluminium, steel and even frameless glass
- Can cover any opening width and any number of panels
- Suits both interior and exterior use

A floor guide is generally not necessary (panels are secured in position by flush bolts or locks).

The stacking arrangement can be situated either to be stacked out of sight (e.g. in a cupboard) or to stack the panels in an area where there is no hindrance to access.

## Construction Keying

Construction Keying allows builders and contractors access to the building whilst it is under construction. Then, at job completion, the pin combination of the lock can be changed simply by inserting the home owner keys supplied into the lock. This bars contractors from entry with their key again (achieved by the 'drop ball method'). In other words, there is no need to change the locks once builders and contractors have finished at the site.

### Benefits:

- Fabricators are given their own Construction Keying System number with 10 free keys

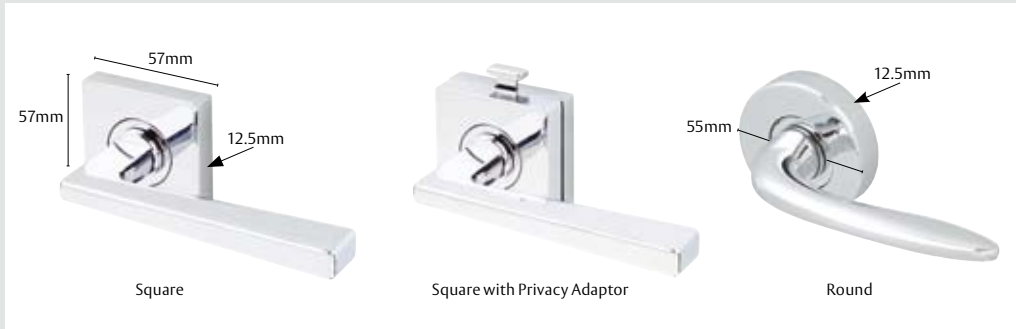

- Construction Keying makes control of keys on the building site much easier for group builders
- The system can be used for multiple building sites, with only one key required for access to all sites

# Daintree Door Furniture

ASSA ABLOY

Daintree door furniture has been designed to maximise continuity of aesthetics throughout your customers home. Daintree is available with eight lever styles, six of which are compatible with the Palladium long plate, allowing for a consistent appearance both inside and outside of the home. With the choice of either a square or round rose, this furniture compliments the range of alternative ASSA ABLOY products, such

as the Paradigm deadbolt making the pair ideal for residential or semi-commercial applications.

### Features:

- High quality for residential or semi-commercial applications
- Range of passage, privacy and dummy functions
- All fixings are concealed
- All handles are non-handed

# Paradigm™ Square

ASSA ABLOY

The Paradigm deadbolt is now available in a square styled option. With all the same features as the standard round rose Paradigm, the new look offers style continuity with other products within the ASSA ABLOY range such as the Lockwood Daintree Square rose from the ASSA ABLOY pull handle range. The deadbolt has the ability to be a double cylinder deadlock as well as cylinder and turn in one lockset, making it a multi-function deadlocking solution.

### DUALSELECT™

Two external locking modes – Safety Mode and Secure Mode.

### SAFETYRELEASE™

Reduces the possibility of accidental lock-in.

### LOCKALERT™

Status Indicator that shows at a glance the lockset mode.

## Talk To Us About Free Scheduling

ASSA ABLOY's Specification Team is available for all your scheduling needs. With product expertise and up-to-date knowledge of relevant New Zealand building requirements we can ensure the most appropriate solutions are specified for your project:

- Hardware
- Access Control
- Electric Locking Security
- Tracking systems
